## Profile

Mark is a Drupal developer with lots of experience in theming, development, site building, migrations, and training. He's been part of the Drupal project since early 2008 and has contributed in a variety of ways. He has a passion for learning, open source, and coding.

## Experience

### WEB SERVICES SPECIALIST, AUSTIN PEAY STATE UNIVERSITY, CLARKSVILLE, TN — 2009-PRESENT

- \* Worked with the University community to migrate all content from an existing file/directory based IIS website into a new Drupal site which I planned and implemented from the ground up
- \* Built mobile D7 sites that featured responsive design principles and integrated with native phone & tablet apps
- \* Provided in-house and virtual training to faculty, staff, and students on how to build content in various systems including the Drupal CMS
- \* Built Drupal development and production servers on a virtual server setup using Ubuntu Linux
- \* Created integrations with third-party applications such as Urban Airship, Luminis, Banner, Scantron, and Desire2Learn (D2L)

### MANAGER OF WEB SERVICES, JONES INTERNATIONAL UNIVERSITY, DENVER, CO — 2004-2009

- \* Developed a Drupal-based content management system to control content for multiple organizational websites
- \* Developed a PHP and XML-based course management system that integrated with an existing learning management system and served over 200 university courses
- \* Created and maintained a student and faculty dashboard application that integrated with multiple outside services such as the student information system, webmail solution, and the course management system
- \* Trained internal staff on how to implement new web technologies in their web courses
